

“Xora has improved driver productivity and company credibility. We can now say with authority where drivers are and what they are doing at any time, which strengthens our relationship to customers. GPS TimeTrack™ will save us \$90,000 on payroll over the course of one year, and at the same time increase by 20 – 30% the number of billable hours each day. Combined with time saved in the office, GPS TimeTrack is the perfect choice for payroll automation and fleet management.”

— Lynda Jones, Partner and Director at Tim Fisher Transport

Tim Fisher Transportation

Spotlight

- ▶ Automated paper-based time sheet and driver management processes
- ▶ Reduced payroll costs by \$90,000 annually due to more accurate time cards
- ▶ Increased billable hours by 20 – 30% due to improved accountability
- ▶ Decreased time spent calculating payroll from 20 to eight hours per week

Background

Tim Fisher Transport is a distributor of household appliances and food products to retailers in Queensland and New South Wales, Australia. The company collected paper time sheets and then ran reports to process payroll and manage its 20-truck fleet. By automating these processes, Tim Fisher Transport has saved money, increased revenue and improve customer service.

Results

Driver productivity has improved since GPS TimeTrack was deployed. Drivers are now billing 20 – 30% more hours each day than before. Payroll is more accurate as well. The company estimates annual payroll savings of more than \$90,000 simply by using GPS TimeTrack to accurately track hours worked. And because payroll is automated, time spent performing this function has been reduced from 20 hours per week to eight.

Challenge

To reduce costs and increase revenue by more accurately tracking driver hours and activities.

Solution

Drivers use the GPS TimeTrack application on their mobile phones to record shift and job start/end times, as well as lunch breaks. They also load ID numbers and miles traveled. Office staff has access to web-based maps showing the location of drivers throughout the day. Payroll is calculated and processed based on reports generated by GPS TimeTrack web interface.
